Professional Summary

React.js Developer with foundational experience in building responsive and interactive web applications. Skilled in UI development, state management, and integrating RESTful APIs. Good knowledge of JavaScript (ES6+), React.js, and modern front-end practices with performance profiling. Experienced in delivering projects from concept to deployment, with exposure to Flutter and cross-platform development. Eager to contribute to collaborative teams and expand expertise in scalable front-end solutions and development.

Technical Skills

- Front-End: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design
- React Ecosystem: React Hooks, State Management, React Router
- Programming: Dart, Java, C++, OOP principles
- APIs & Tools: RESTful APIs, Git/GitHub/GitLab, Agile/Scrum basics
- Cross-Platform: Flutter & Dart for mobile applications
- Other: Application Development, Problem Solving, Debugging

Projects

Schools Buffets Management System – Owner/Admin Web Application

Sep 2025 | GitLab: https://gitlab.com/thedarkhawk9177-group/buffet-management

- Developed a full-stack web platform to manage buffets across multiple schools.
- Implemented CRUD operations for buffets, workers, suppliers, categories, and inventory.
- Designed dashboards to track profits, losses, transactions, complaints, and sales.
- Integrated real-time notifications for worker/customer actions.
- Automated report generation for sales, spoilage, and inventory tracking.

The React Quiz

Oct 2025 | GitHub: https://github.com/abd-alrahan/react-quiz

- Developed a web app for quizzes with multiple levels (Easy, Medium, Hard).
- Implemented timers, score tracking, progress bar, and high-score saving.
- Added navigation, result summary, and feedback animations for better UX.

Classy Weather

Jul 2025 | GitHub: https://github.com/abd-alrahan/classy-weather

- Built a weather web app with location and flag detection.
- Displayed 7-day forecast with day and night temperatures.
- Handled partial city matches with instant search feedback.

usePopcorn

Jul 2025 | GitHub: https://github.com/abd-alrahan/usepopcorn

• Created a movie web app for searching and rating films.
• Displayed movie details and CRUD operations for managing watched movies with average stats.

Eat-N-Split

Jun 2025 | GitHub: https://github.com/abd-alrahan/eat-n-split

• Developed a bill-splitting web app to track balances with friends.
• Calculated owed amounts with visual color indicators for different situations.
• Added friend management with live updates.

Far Away

Jun 2025 | GitHub: https://github.com/abd-alrahan/travel-list

• Built a travel packing web app to organize trip items.
• Tracked packing progress with item counts, packed percentage with filters to sort packed and unpacked items.

Home Workout System – Trainer/Admin Application

Jun 2024 | GitHub: https://github.com/abd-alrahan/adminfitness

• Built an admin app to manage exercises, diets, and fitness tips for users.
• Implemented user management features including removal of redundant users.

Home Workout System – Trainee Application

Jul 2024 | GitHub: https://github.com/abd-alrahan/myfitness

• Developed a mobile app for home workouts and fitness tracking.
• Enabled trainees to follow exercise plans, diets, and trainer-provided tips.

Education

• Bachelor of Science in Informatics Engineering (Software Engineering)
 Damascus University | Expected 2026
• React JS Development Course (Udemy, Completed Jul 2025)
• Flutter & Dart Development Basics Course (Udemy, Completed May 2024)

Training

• Web Development Intern – Al-Mounkez Company
 Damascus, Syria | Nov 2024 – Feb 2025 (3 months)
 - Assisted in developing web features using HTML, CSS, and JavaScript.
 - Collaborated with senior developers on bug fixes and feature enhancements.

Languages

• English – B2 (Upper Intermediate)
• Arabic – Native
